

GELATIN CAPSULES FOR INHALED DRUG DELIVERY

All Quali-G™ capsules are
100% PORCINE FREE

Pharmaceutical Grade

Pharmaceutical-grade quality. The manufacturing process is carried out following strict pharmaceutical criteria and certified according to ISO 9001 and ISO 14001. Drug Master Files for the US and Canada have been registered.

Strict Microbiological Control

Specific microbiological control. As active ingredients are inhaled directly into the lung, capsules for this delivery route require lower microbial levels than those used in oral administration.

Preservative Free

QUALICAPS® INNOVATION

Strict process controls ensure the compliance of microbiological requirements **without the use of preservatives.**

100% automatic camera inspection
QUALICAPS® INNOVATION

All Quali-G™-I capsules are **inspected using an automatic camera system** to detect and remove defective units. Available in three sizes (**size 3**, the most common in inhalation, and **sizes 2 and 0** for higher doses) and in a **wide range of colors** with different print options.

100% bovine bone
PREMIUM

Quali-G™-I capsules are made from **100% bovine bone** gelatin assuring compatibility with regard to certain dietary and religious restrictions on other animal sources.

Our **scientific business development team** can support R&D in capsule dosage delivery.

Our **technical service engineers** can assist in achieving productivity yields in capsule filling.
