QUALICAPS® INNOVATION

COMPOSITION

Polymer
(Hypromellose)

Gelling agent
(Carrageenan)

Gelling promoter
(Potassium Chloride)

Dyes

MAIN FEATURES

- Quick and predictable dissolution profile for rapid dissolving drug products
- Lower moisture content and water permeability than gelatin
- Physically stable, with better performance than gelatin in terms of brittleness
- Chemically stable and does not undergo crosslinking reactions
- Qualicaps® also offers TiO₂-free capsules upon request
- An even lower moisture content version is available:

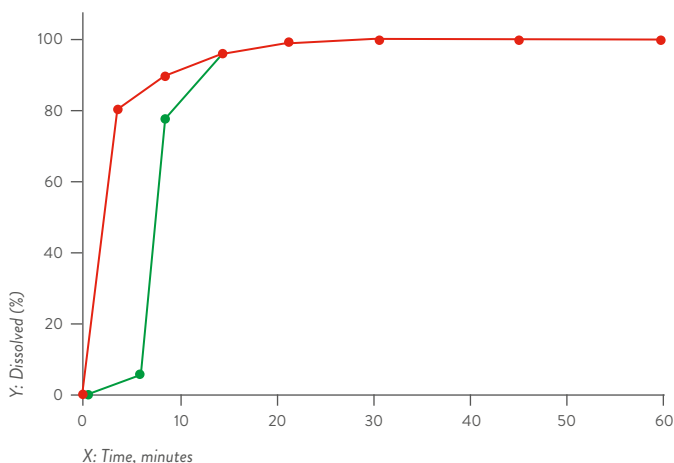

MOISTURE CONTENT

4.0% – 6.0%

DISSOLUTION PROFILE

Quali-V® capsules are equivalent in their dissolution profile to traditional hard gelatin capsules.

Capsule fill formulation: Acetaminophen 50mg,
Lactose 175mg
Fill weight: 250mg (Size 1 capsule)
Dissolution test method: Paddle at 50 rpm
